Environmental Sociology

European Perspectives and Interdisciplinary Challenges

Matthias Gross, Helmholtz Centre for Environmental Research – UFZ, Department of Urban and Environmental Sociology, Leipzig, Germany; **Harald Heinrichs**, Institut für Umweltkommunikation (INFU), Leuphana Universität Lüneburg, Germany (Eds.)

This is the first book to broaden the realm of environmental sociology by forging links to other environmental disciplines, such as environmental policy, media studies, geography, ecological economics, ecological modeling, or ecological design. The book's focus on current environment-related issues in interdisciplinary developments are not only of relevance for strengthening environmental sociology but will make it a great read for upper undergraduate and graduate courses in social sciences dealing with environmental topics.

More on http://springer.com/978-90-481-8729-4

- ► Covers a broad spectrum of sociological and environmental social science concepts ranging from rational choice, practice theory to earth system governance;
- ► Focuses on the inter- and transdisciplinary potential of environmental sociology;
- ► Discusses modern societies' reform needs, limits and new possibilities to adapt to and shape its natural environments; and
- ► Highlights the potential to social sustainability transformation at large.
