

A full success: MKWI 2018

For four days, scientists from Germany, Austria, Lichtenstein and Switzerland discussed topics related to digitization and the motto of the Business Informatics annual conference "Data driven X - Turning Data into Value". In 29 sub-conferences and one poster session, more than 200 scientific contributions presented (Proceedings). At the opening of the conference, the Lower Saxony Minister for Science and Culture, Björn Thümler, spoke about the planned program to expand research funding and the transfer of knowledge, to expand digitization and to strengthen the innovative teacher training in Lower Saxony.

Keynote speakers like Roland Scharrer from AXA Germany, to the topic "DATA-DRIVEN INNOVATION @ AXA -Challenges of a holistic transformation in insurance" and David Kriesel on his hobby "SpiegelMining - Reverse Engineering by SpiegelOnline".
