

Prof. Dr. Trevor Hastie: "Statistical Learning with Big Data"

Research Colloquium on Information Systems and Data Science, Prof. Dr. Trevor Hastie, John A. Overdeck Professor, Professor of Statistics and Professor of Biomedical Data Science at Stanford University, will give a lecture on “Statistical Learning with Big Data”

Date and location: July 04, 2018 14:15 UC 40.256

Abstract:

As our ability to gather and store data improves, we are faced with the task of analyzing these ever-growing mounds of information. This has required Statisticians to gain computing and database skills, and Engineers and Computer Scientists to learn statistical modeling and data analysis. The result is a data scientist, one of the hottest job-descriptions in the tech world. In this talk I will give some examples of big data and data-science challenges, and explore some approaches in detail.
