The RePEc Ranking of German Economists Working in Germany

The ranking below lists only those German economists actually working in Germany. All those attributed by RePEc to Germany solely on account of their affiliation to a German-based network have been purged from the list. The list was compiled with the information available on the RePEc website on October 1st, 2006.

(See RePEc criteria for constructing its rankings)

Rank	Name	Research Network	Affiliation
1	**Hans-Werner Sinn**	CESifo Group Munich	University of Munich
2	**Harald Uhlig**	CESifo Group Munich	Humboldt-Universität, Berlin
3	Martin F. Hellwig		Max-Planck-Gesellschaft
4	**Dennis Snower**	CESifo Group Munich	Kiel Institute for the World Economy, University of Kiel
5	**Kai A. Konrad**	CESifo Group Munich	Social Science Research Centre Berlin (WZB)
6	**Frank Rafael Smets**	CESifo Group Munich	European Central Bank, Frankfurt am Main
7	**Klaus M. Schmidt**	CESifo Group Munich	University of Munich
8	Juergen von Hagen		Rheinische Friedrich-Wilhelms-Universität, Bonn
9	Wolfgang Karl Härdle		Humboldt-Universität, Berlin
10	Volker Wieland		Johann Wolfgang Goethe-Universität, Frankfurt am Main
11	Klaus F. Zimmermann	IZA	Rheinische Friedrich-Wilhelms-Universität, Bonn; DIW, Berlin; IZA, Bonn
12	**Armin Falk**	CESifo Group Munich	Rheinische Friedrich-Wilhelms-Universität, Bonn
13	Helmut Bester		Free University Berlin
14	**Reinhard Selten**	CESifo Group Munich	Rheinische Friedrich-Wilhelms-Universität, Bonn
15	Benny Moldovanu		Rheinische Friedrich-Wilhelms-Universität, Bonn
16	**Hans Gersbach**	CESifo Group Munich	Ruprecht-Karls-Universität, Heidelberg
17	**Michael Funke**	CESifo Group Munich	University of Hamburg
18	Joachim Wagner		University of Lüneburg
19	**John H. Komlos**	CESifo Group Munich	University of Munich
20	**Monika Schnitzer**	CESifo Group Munich	University of Munich

RePEc Criteria for Constructing Rankings

RePEc compiles its author rankings on the basis of average scores resulting from:

1. Number of distinct works per author (different versions of the same work published in different series or journals are counted only once)
2. Number of citations (determined from references of listed works and excluding self citations).
3. Weighting by number of authors (the score of each work is divided by the number of authors)
4. Number of pages published in journals, whereby different versions of the same work published in different series or journals are counted only once
5. Number of abstract views in RePEc services over the past 12 months
6. Number of downloads through RePEc services over the past 12 months

Each of these criteria is then weighted by **simple impact factors** (ratio of citations by the number of items in the series) and by **recursive impact factors** (i.e. by citations, then weighing each citation by the impact factor of the citing items, this impact factor being itself computed recursively in the same fashion. The recursive impact factors are normalized so that the average citations has a weight of 1).
