

Some important insights of the Td Summer School 2012

- *I get a lot of inspiration from the people of the summer school, great group of people, you can be yourself and the learning process is tremendous*
- *Especially we learnt to look for methods to use in specific stages of a project*
- *Many projects would profit from a broadening through Td perspective*
- *my impression is that the conductors and facilitators are doing a very good job in bringing the idea of td quite subtle in the group*
- *End user integration is more than communication, it's about integration and participation*
- *A Td process and stakeholder involvement is a big responsibility. Shared responsibility with the stakeholders involved in the Td process is the key for success*
- *Td research projects create socially relevant knowledge*
- *Td research is a way of seeing the „whole picture“*
- *Td motivates me to continue working in science*
- *I learnt how to design problem oriented research questions*
- *A transdisciplinary family is building*
