

SUSTAINABILITY SCIENCE

Master Programmes

- MSc Sustainability Science: Ecosystems, Biodiversity and Society
- MSc Sustainability Science: Resources, Materials & Chemistry
- MA Sustainability Science: Governance & Law
- MA Sustainability Science: Entrepreneurship, Agency & Leadership

Prof. Dr. Dr. h.c. Stefan Schaltegger

LAUNCH OF NEW SUSTAINABILITY MASTER PROGRAMMES

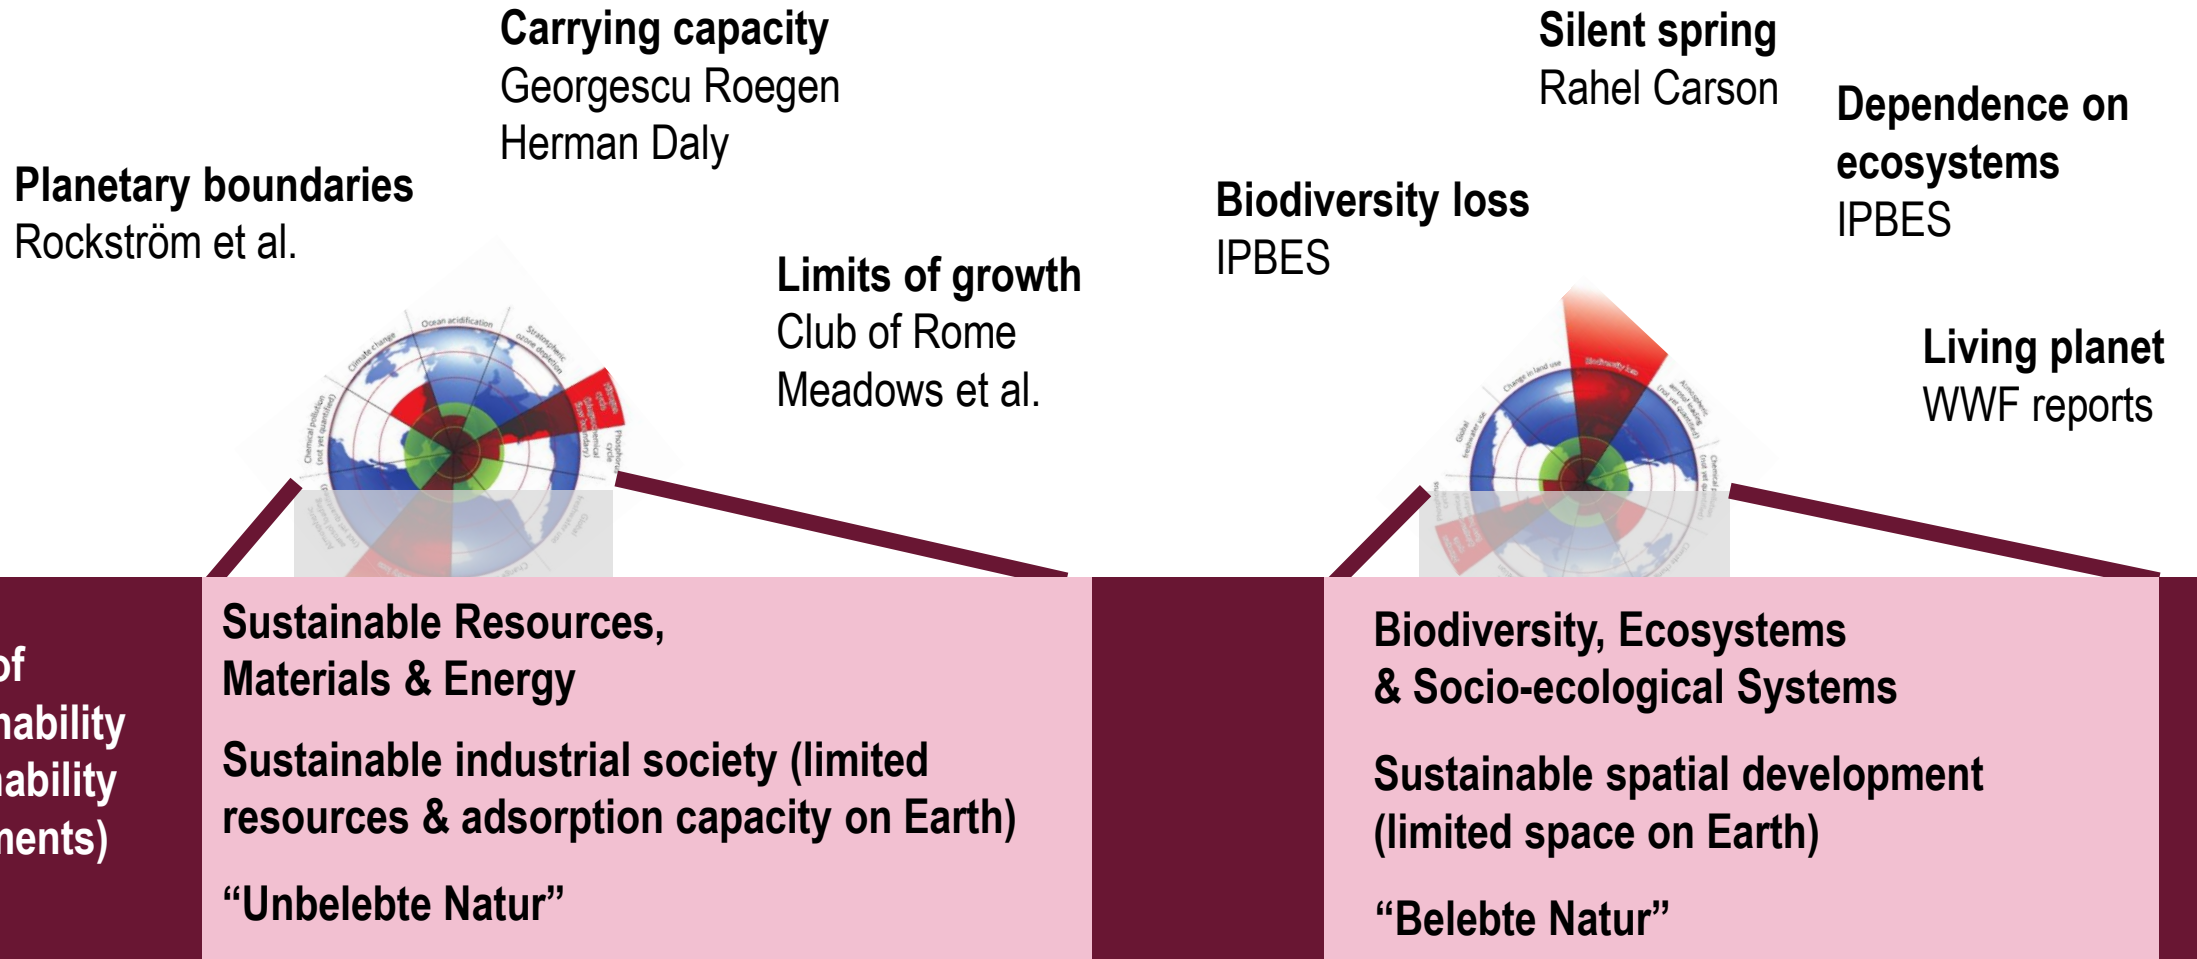

- WINTER 2024/2025

- 4 new programmes to address sustainability challenges and transformation in depth
- Sustainability Science as the connecting approach of all programmes
- 2 natural science- and 2 social science-based programmes:
 - Sustainability Science: Ecosystems, Biodiversity and Society
 - Sustainability Science: Resources, Material Flows and Chemistry
 - Sustainability Science: Governance and Law
 - Sustainability Science: Entrepreneurship, Agency and Leadership

CONTRIBUTING TO SUSTAINABLE DEVELOPMENT

- ACTING IN THE SAFE SPACE OF NATURAL SCIENTIFIC (PHYSICAL) LIMITS ON EARTH

CONTRIBUTING TO SUSTAINABILITY TRANSFORMATIONS

- ACTING FOR CHANGE TOWARDS A SUSTAINABLE SOCIETY

Sustainability Transformations

Macro-level

Nations, supranational, global

Governance, Law, Political Science, Economics

Micro- & meso level

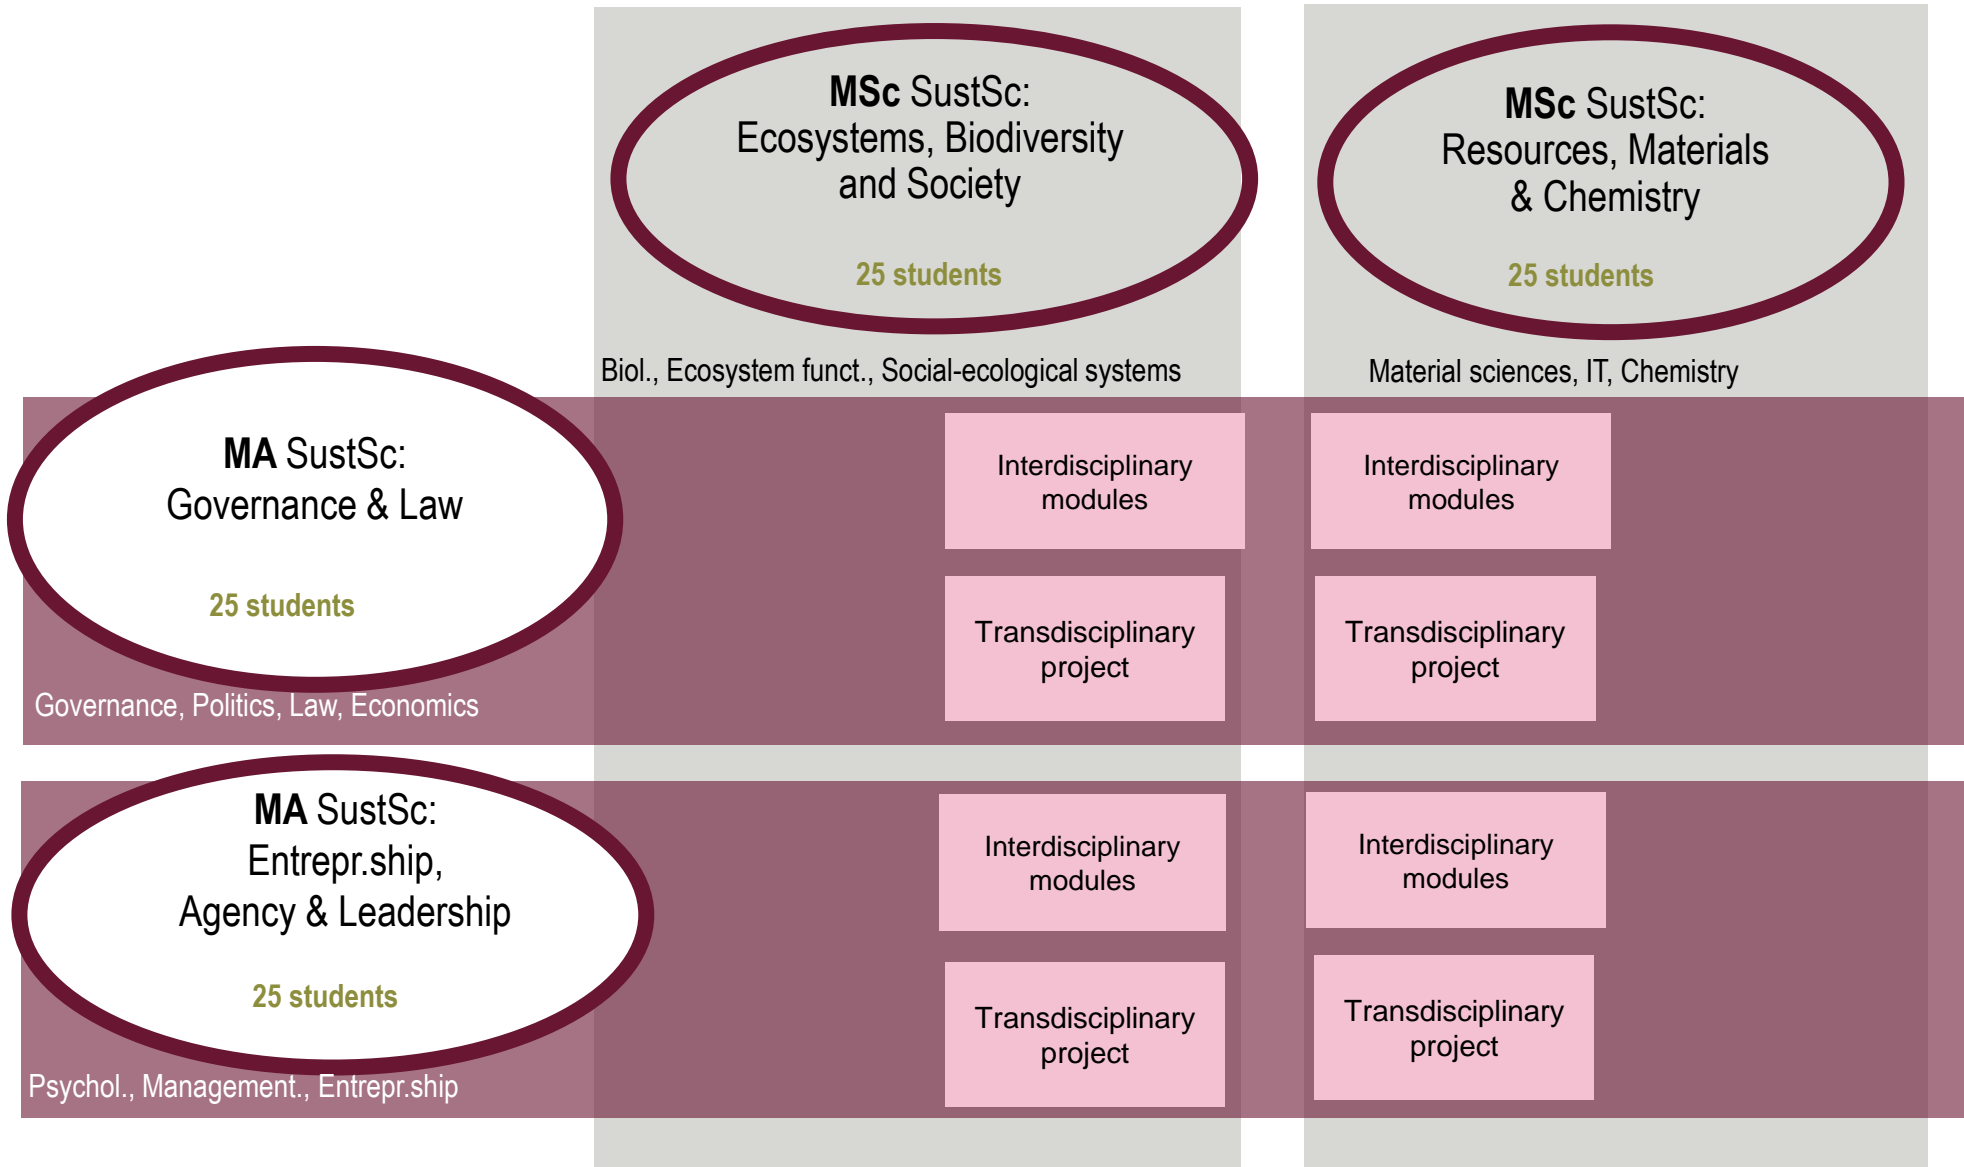

individuals, organisations,
movements, networks

Psychology, Agency, Entrepreneurship,
Management, Leadership

Acting in the physical boundaries of planet Earth

Sustainability transformations

THE PROFILE OF OUR SCHOOL FOR SUSTAINABILITY IS UNIQUE

- **Sustainability at the heart:** the only university faculty/school for sustainability in Germany
- **Clear sustainability-orientation of the master programmes:** advanced natural and social sciences-based studies in **sustainability science**.
- **Inter- and transdisciplinary focus:** research and project-oriented studies, links to research and development projects of the institutes
- **Methodological strength:** in-depth education in professional and methods
- **Embedding:** complementary interdisciplinary modules and structured transition to doctoral programmes
- **Internationality:** Wide range of excellent international contacts on professor, faculty and university level

THE WORLD IS FULL OF PROBLEMS & UNIVERSITIES ARE FULL OF DISCIPLINES

- TIME FOR NEW WAYS OF INTEGRATED THINKING!

- Our master programmes attract creative personalities to **develop critical thinking skills** and **solution-oriented competencies to contribute effectively to sustainable development** at different levels
- To support you on your journey to sustainability excellency, our programmes **combine disciplinary with interdisciplinary and transdisciplinary methods and knowledge**. We integrate scientific analyses with practice-oriented approaches to help you develop **action-oriented competence**.
- Our teaching is closely aligned with **cutting-edge sustainability research**. You will reflect **international discourses** and be involved in **sustainability projects**.
