Manual for the App “Diktiergerät“ for Android Smartphones

Fig. 1: You can find the 'Diktiergeräte' app in the Google Play Store for Android devices.

Fig. 2: First, the approvals must be agreed to. The red button in the middle starts the recording.

Fig. 3: Fig. 3: The button with the two red lines pauses the recording, the large button with the square stops and saves the recording.

Fig. 4: If recording is stopped, the file can immediately be named.
Fig. 5: The lower bar is the context menu. Here, you can play back old recordings (left), record new ones (middle) or edit settings (right).

Fig. 6: If you click on a recording in the mode that is marked red (as seen in Fig. 5, play back recordings), it can be edited (red), deleted (blue) or sent (green).

Fig. 7: If you click on the scissors (red) in Fig. 7, an explanation of how the file can be edited is displayed. The main functions are Trim, Remove Part, Add Copy.

Fig. 8: If you want to keep only a part of the recording, you can select it using the two arrows (green and red). The result can then be saved in the lower right corner.
Fig. 9: If a part is to be removed from the image, select "Remove centre" and continue as described in Fig. 8.
**Tip:** In the lower bar you can listen to the result before saving.

Fig. 10: Finally, you can rename the edited recording. The old, unedited recording will not be lost.
