

LEUPHANA POSTDOC FELLOWSHIP PROGRAM

→ ADVANCE YOUR ACADEMIC CAREER
IN AN INSPIRING RESEARCH ENVIRONMENT

LEUPHANA
UNIVERSITY OF LÜNEBURG

ADVANCE YOUR CAREER IN ACADEMIA IN A SUPPORTIVE ENVIRONMENT

We invite excellent early-career researchers (R2) to prepare for the next step in their academic career. If you have already developed an excellent track record as a researcher and recently obtained your doctoral degree, you can become a postdoctoral fellow in one of Leuphana's exciting research environments, such as the international research enterprise **Embracing Transformation through Research, Education, and Transfer**.

Leuphana is the right place if you look for:

- an opportunity to sharpen your academic profile in a stimulating, interdisciplinary, and transformation-oriented research environment,
- a chance to complete high-quality publications on your own research concepts and projects,
- the freedom to focus on completing a grant application in a format of excellence for early-career researchers,
- a great support infrastructure to take your academic ambition to the next level,
- an inspiring international experience to build your network in academia.

APPLY

FOR A POSTDOC FELLOWSHIP TO FOCUS ON YOUR RESEARCH

We invite you to come to Leuphana University of Lüneburg as a postdoctoral fellow, using one of the following options:

- You have already acquired a scholarship, funded e.g. by the German Research Foundation (DFG) or Alexander von Humboldt Foundation (AvH). You are now looking for an inspiring place that serves as a host institution.
- You and Leuphana jointly develop your project application for e.g. DFG or AvH schemes.
- You apply for one of our Leuphana postdoc scholarships modelled on DFG and AvH standards. Your experience and family situation will be reflected in the scope of the scholarship, which can run for up to two years.

We generally welcome fellows in all our areas of research. Leuphana scholarships in particular are available in the following areas:

- Transformation Knowledge (e.g. Epistemology, Psychology of Transformation)
- Democratic Resilience
- Organizing in Times of Crisis
- Climate Futures in Digital Cultures
- Companies as Drivers of Sustainability Transformations
- Toward a Regenerative Society
- Empirical Educational Research

BECOME

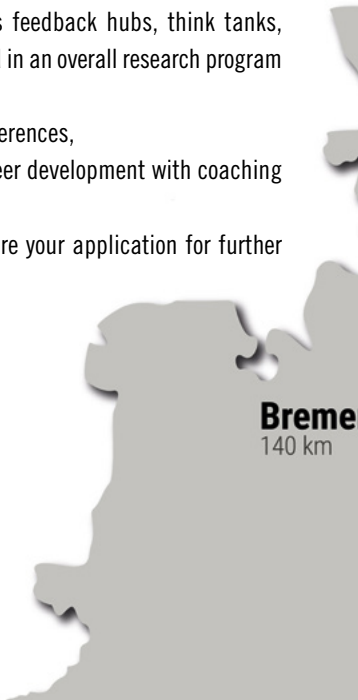

A LEUPHANA POSTDOC FELLOW IN A DYNAMIC RESEARCH AREA

Climate change, digitalization, socio-political upheavals, globalization, new working and organizational models – the present is characterized by profound changes. The future viability of societies depends crucially on their capacity to manage transformations. Leuphana is a specialized, interdisciplinary, and innovative university addressing these major transformations of contemporary societies in its five schools: Education, Culture and Society, Management and Technology, Sustainability, and Public Affairs.

You can benefit from freedom of scientific research and work with scholars who are at the forefront of innovation and value creation in specific fields of research.

Leuphana offers a great research environment with reliable support structures for the development of your career, including:

- various research groups acting as feedback hubs, think tanks, and collaborative spaces, embedded in an overall research program on transformation,
- funding for research trips and conferences,
- career counseling and postdoc career development with coaching options,
- individual support while you prepare your application for further funding.

JOIN US IN LÜNEBURG WHERE HISTORY MEETS SCIENCE

The Hanseatic City of Lüneburg combines picturesque medieval architecture with lots of nature in the nearby countryside. To get around, an affordable public transport ticket valid in all of Germany is available – or you simply go by bike.

The exciting metropolis of Hamburg is just half an hour's train ride away. Berlin is easy to reach, too, with multiple daily train connections, each taking little more than two hours. The two nearest international airports are Hamburg (HAM) and Hanover (HAN).

ENJOY WORKING AT A GREEN AND SUSTAINABLE UNIVERSITY

Leuphana's campus, characterized by its historical military architecture, has been converted into a vibrant and green space for learning, research, and meeting old and new friends. The central building, designed by architect Daniel Libeskind in cooperation with students, encourages to take new perspectives through its distinct shapes on the out- and inside.

But it is not only the campus that is green (and even climate-neutral since 2014). Leuphana's School of Sustainability, founded in 2011, was the first of its kind in Germany and contributes to the university's research profile ever since. Even below faculty level, many student initiatives focus on making Leuphana even more sustainable.
