How to connect to the VPN

You will need:

- Internet connection
- current Androidversion
- Name of your Leuphana account and Leuphana password

Download and add the connections

- 1. Download the Cisco Secure Client-AnyConnect app in the Play Store.
- 2. Open the app, go to *Connections* and add a connection via the plus button.
- 3. Insert **vpn.leuphana.de** in the server adress field and confirm with OK and Done

Connecting to the VPN
