

# How to connect to the VPN

*Windows*

Updated: 06/2025

## You will need:

- Internet connection
- Administrator rights
- Name of your Leuphana account and Leuphana password
- System type

1

## System type?

Check your processor. To do this, go to Windows Settings → System → About and check your processor type under *System type*. Please follow the respective instructions.

2

## x64-based processor

1. Go to [vpn.leuphana.de](https://vpn.leuphana.de).
2. Choose *Online-Recherche* and log in with the name of your Leuphana account and Leuphana password.
3. Start the download
4. Open the downloaded file and follow the installation wizard.

## ARM-based processor

1. Go to [e.feu.de/vpn-arm-windows](https://e.feu.de/vpn-arm-windows). The download will start automatically.
2. Open the downloaded file and follow the installation wizard.

3

## Connecting to the VPN

1. Open *Cisco AnyConnect*.
2. Enter ***vpn.leuphana.de*** and click *Connect*.
3. Choose between *Intranet* and *Online-Recherche*.
4. Log in with the name of your Leuphana account and Leuphana password.

VPN:  
Ready to connect.

Please enter your Leuphana account and password.
