

How to connect to the VPN

iOS/ iPadOS

Last updated: 09/2026

You need:

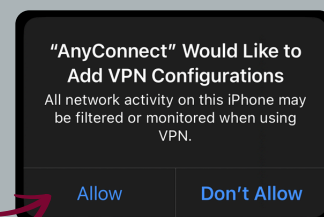

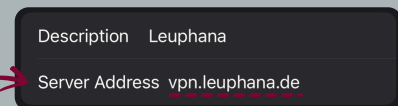

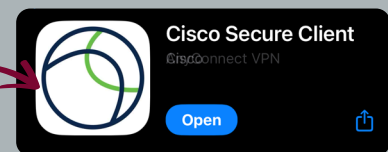

- Internet connection
- current iOS/iPadOs
- Leuphana email adress and password

App Store

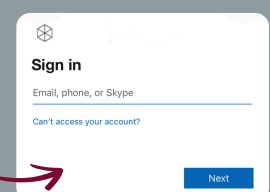

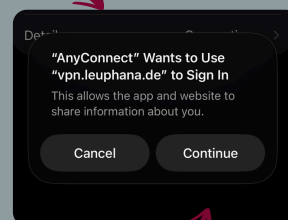

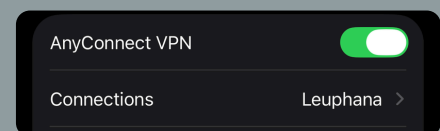

1 Installation and adding the Connection

1. Download the *Cisco Secure Client-AnyConnect* app from the store.
2. Open the app, go to *Connections*, and tap the plus sign to add a new connection.
3. Under Server address enter one of the following options:
 - *vpn.leuphana.de/intranet-mfa* for the intranet (access to the campus network)
 - *vpn.leuphana.de/online-recherche-mfa* for online research (the library's globally licensed resources)
4. Confirm by tapping *OK* and *Done*.

2 Establish VPN-Connection

1. Open the *Cisco AnyConnect* app.
2. Set the toggle in the Start menu to *On*.
3. When prompted, click *Continue*. A window will open in your browser.
4. Log in as usual using your *Leuphana email address, password, and MFA method*.
