

How to connect to the VPN

Windows

Last Updated: 09/2026

You will need:

- Internet connection
- Administrator rights
- Leuphana email address and password
- System type

1

System type?

Check your processor. To do this, go to Windows Settings → System → About and check your processor type under *System type*. In Step 2, select the installation file that matches that type.

2

Installation

1. Open vpnclients.leuphana.de in your browser.
2. Select the download file that matches your device and start the download.
3. Then open the downloaded file and follow the installation wizard.

3

Connecting to the VPN

1. Open *Cisco Secure Client*.
2. If the drop-down list of available VPN connections is empty after the installation, please manually enter one of the following:
 - vpn.leuphana.de/intranet-mfa for Intranet (access to campus network)
 - vpn.leuphana.de/online-recherche-mfa for Online-Recherche (globally licensed library resources)
3. Click *Connect*.
4. A Microsoft window will open in your browser. Log in as usual with your *Leuphana email address, password, and MFA method*.
