

# Exhibition and book launch: "Die Ankunft eines Kätzchens. Die 1. Computersimulation eines Lebewesens"

On 31st January 2019, the exhibition "Die Ankunft einer Katze. Die 1. Computersimulation eines Lebewesens" will take place at the Kunstraum (Leuphana Campus). From 3 pm onwards the participants of the eponymous seminar cordially invite everyone interested to this event. In addition to visual stagings as well as analog and digital artifacts, you can expect a film screening and a radio show. Further topics include computer-coding, kinetic art, various cat models, contemporary technology simulations and a blog. Additionally, there will be a book launch of Martin Warnke's and Wladimir Velminski's book on the cat's simulation in the historical context of the Soviet Union of the 1960s.

For more information about the Project and the book launch go to the eponymous blog of the project.
